## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 18 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #4,534,142 to DREFAHL. DREFAHL discloses a sheet of vegetation with a structural matting (12, 14, 16), see figure 3; arranged on a non-woven permeable underlay (10) capable of being filled with a substrate (28) and plant material (S), column 1, line 8; wherein, the underlay (10), being permeable, column 1, lines 38-40 and column 4, lines 48-52, inherently have holes. In reference to claim 18, the structural matting (16) is a looped mat. Regarding claim 25, the matting (12, 14, 16) and underlay (10) is reinforced as at (26) to accommodate tensile forces, column 5, line 36.

Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #4,534,142 to DREFAHL. DREFAHL discloses the process for manufacturing a sheet of vegetation including a structural matting (12, 14, 16), see figure 3; with an underlay (10) arranged thereon and capable of being filled with a substrate (28) and a plant material (S), column 1, line 8; wherein, the underlay (10), being permeable, inherently includes holes; wherein, the sheet is rolled out flat and is then filled with the substrate.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2,3,16-24 are rejected under 35.U.S.C. 103(a) as being unpatentable over US Patent #4,534,142 to DREFAHL. DREFAHL discloses the basic claimed body of vegetation except for the specifics of the material characteristics such as material type, weight and number and size of holes formed therein. In reference to claim 2,3,16 and 17, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select a known material and hole size and number suitable for the use intended as an obvious matter of design choice. For instance, if it is desired to saturate the mat, larger size and greater number of holes would be use; whereas, if less saturation is needed, a smaller number and size of holes would be used. Regarding claim 19, DREFAHL discloses the use of a structural mat that is a fiber mat; however, he does not teach the use of coconut fibers, column 6, line 31. In further reference to claim 19, and in reference to claims 20-24, as far as the material of the underlay, this too is an obvious matter of design choice. Also, the selected material, as far as DREFAHL is concerned, should prevent rotting and corrosion, and should facilitate germination and should possibly be a good insulator.

***Allowable Subject Matter***

Claims 29 and 30 are allowed.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the newly revised ground(s) of rejection.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
